

All around the world

All around the world
All around the world
All around the wide world

All around the world
All around the world
All around the wide world

Put a song in the air and it will go
Places you will never know

All around the world
All around the world
All around the wide world

Put a song in the air and it will heal
Make the head and heart to feel

All around the world
All around the world
All around the wide world

Put a song in the air and it will break through
The barriers jumped up 'tween me and you

All around the world
All around the world
All around the wide world

All around the world
All around the world
All around the wide world
